

## Salo IoT Campus

Salo IoT Campus is located in Nokia's mobile phone headquarters and premises that served as a telephone factory in Salo, Finland. Today, the facilities serve as modern training, office and production facilities. The campus area is home to a multi-expert community of nearly 100 companies. We have been part of the campus since 2018 in its transformation of spaces and the development of new visions.

Salo IoT Campus is a community of companies, scientists and educational institutions.
