

Strandgatan No.1

SIGGE Architects' proposal **Strandgatan No.1** won the first prize in Vaasan Museonranta invited architectural competition. FinCap and the City of Vaasa organized an architectural competition for the design of the new building at Rantakatu 1. The purpose of the competition was to find a high-quality and feasible solution in terms of cityscape and architecture. The design had to also adapt to the cultural environment and achieve functional, techno-economic and energy efficient goals in a balanced way.

A modern 12-storey residential and commercial building will be built on the best location in Vaasa, by the sea. In the waterfront area, next to the site, you will find culturally and historically valuable buildings such as Åbo Akademi University's Vaasa campus, the Vaasa Museum seashore area, and the marina.

The building consists of the residential building and an integral triangular pedestal part. On the pedestal, above the street, is a green yard for the residents of the house. Business and office premises are located on the ground level. The three sides of the building are bordered by a balcony area.

Location	Vaasa, Finland
Client	FinCap and the City of Vaasa
